## EXPERIENCE

### ByteWise, Karachi — *Front-End Intern*

Feb 2023 - June 2023

Excelled in a Frontend Internship utilizing React.js, driving the creation of visually appealing and performant user interfaces.

### Procom, Karachi — *Web Developer*

Oct 2023 - Dec 2023

Developed a cutting-edge website for Procom events using Next.js, Tailwind CSS, Shadcn/ui, incorporating a metaverse-inspired theme.

## EDUCATION

### Fast Nuces, Pakistan — *BSc in Software Engineering*

Sep 2021 - June 2025

### The Lyceum, Pakistan — *A-levels*

Sep 2019 - Aug 2021

## PROJECTS

### Visualization of geometric algorithms (Java Fx)

Implemented a JavaFX-based application to visualize various geometric algorithms, including Quick Hull, Jarvis March, Brute Force, Quick Elimination, and Graham Scan. The project showcases interactive demonstrations of these algorithms, providing a comprehensive tool for understanding and studying geometric computational methods.

### Weather App (React Js)

Dynamic Weather Application using React.js and Tailwind CSS, integrating OpenWeatherMap API for real-time weather data.

### Article Summarizer (Next Js)

Web application using Next.js, TailwindCSS, and Axios that allows users to input a URL and receive a concise summary of the blog or article. The application utilizes API requests to fetch and process the content for summarization.

## SKILLS

C, Java, Javascript  
Next Js, Tailwind CSS,  
Next Auth, Vercel Deployment  
Strong understanding of data structures.  
Api integration, axios

## LANGUAGES

English, Urdu
